ADHD Test report (Real and Accurate)	09

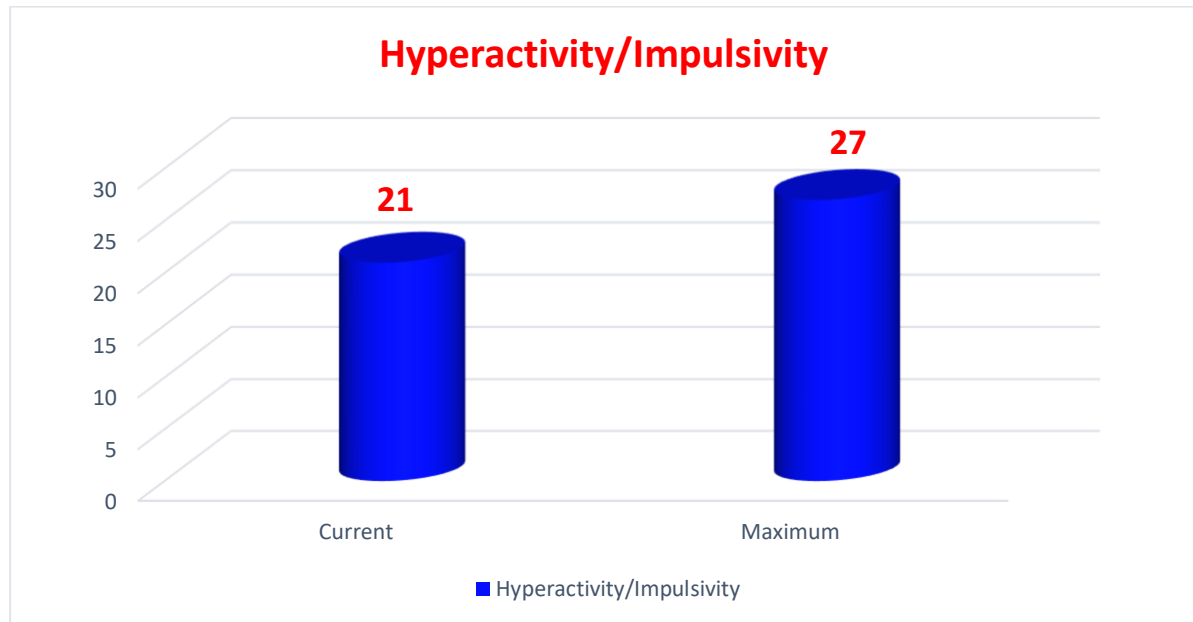

# Inattention

- **Inattention:**

- Short attention span for age (difficulty sustaining attention)
- Difficulty listening to others
- Difficulty attending to details
- Easily distracted
- Forgetfulness
- Poor organizational skills for age
- Poor study skills for age

## Hyperactivity/Impulsivity

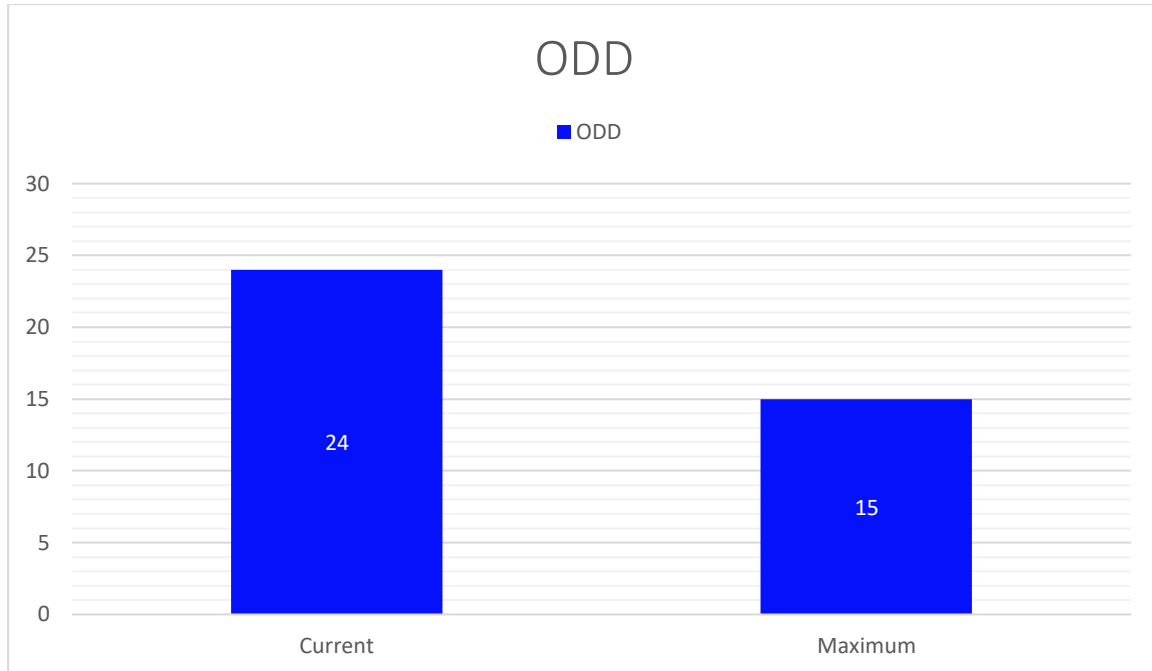

- **Impulsivity:**

- Often interrupts others
- Has difficulty waiting for his or her turn in school and/or social games
- Tends to blurt out answers instead of waiting to be called upon
- Takes frequent risks, and often without thinking before acting

- **Hyperactivity:**

- Seems to be in constant motion; runs or climbs, at times with no apparent goal except motion
- Has difficulty remaining in his/her seat even when it is expected
- Fidgets with hands or squirms when in his or her seat; fidgeting excessively
- Talks excessively
- Has difficulty engaging in quiet activities
- Loses or forgets things repeatedly and often
- Inability to stay on task; shifts from one task to another without bringing any to completion

## Oppositional Defiant Disorder (ODD)

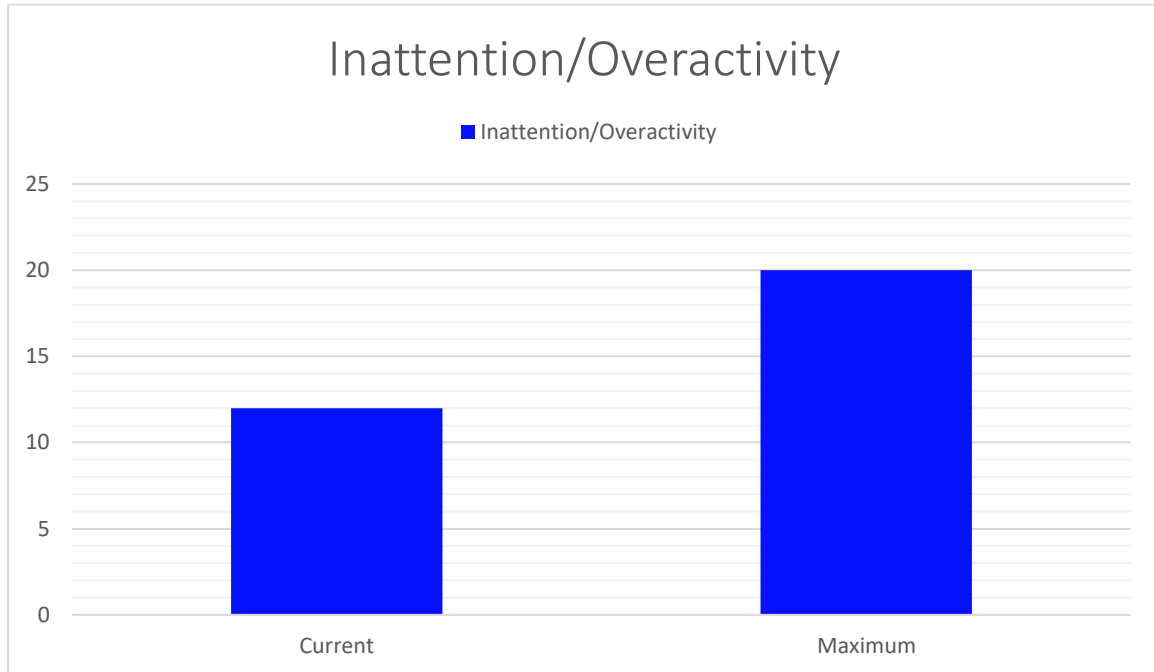

Oppositional defiant disorder (ODD) is a behavior disorder in which a child displays a pattern of an angry or cranky mood, defiant or combative behavior, and vindictiveness toward people in authority. The child's behavior often disrupts their daily routine, including activities within the family and at school.

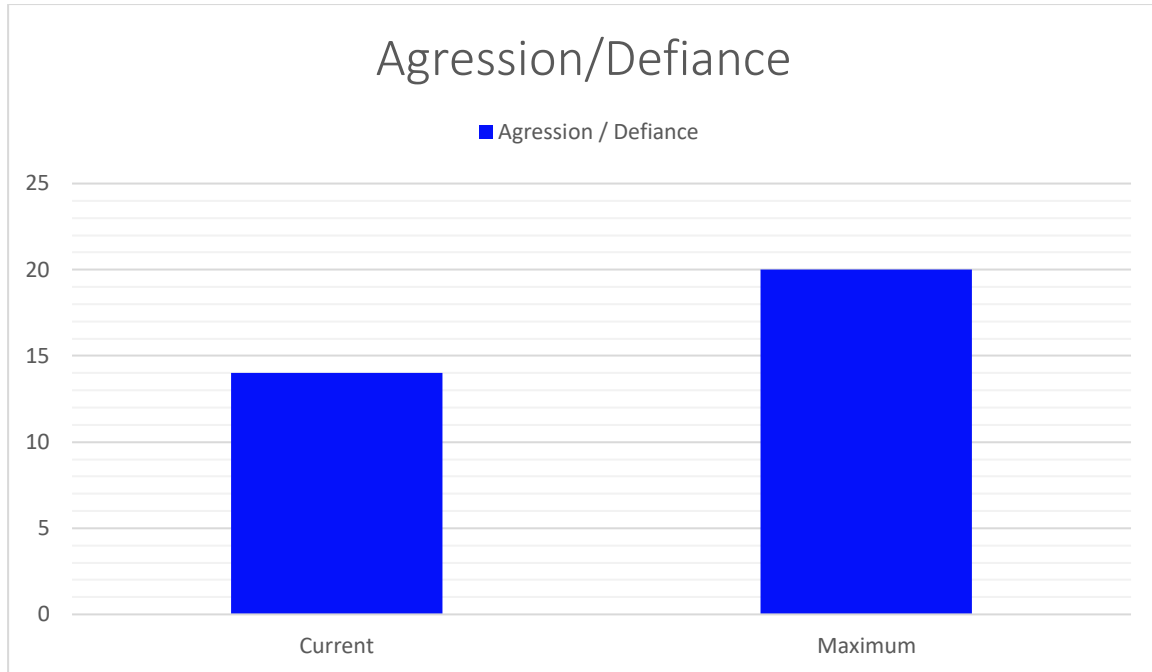

ODD can vary in severity:

- **Mild.** Symptoms occur only in one setting, such as only at home, school, work or with peers.
- **Moderate.** Some symptoms occur in at least two settings.
- **Severe.** Some symptoms occur in three or more settings.
