# Test Material

## Meghan's behavior during drawing

Mental age is a concept related to intelligence. It looks at how a specific individual, at a specific age, performs intellectually, compared to average intellectual performance for that individual's actual chronological age.

Chronological age is a measure of an individual's age based on the calendar date on which he or she was born.

## Cognitive skills:

Cognitive ability, sometimes referred to as general intelligence (g), is essential for human adaptation and survival. It includes the capacity to “reason, plan, solve problems, think abstractly, comprehend complex ideas, learn quickly, and learn from experience.

## Reasoning:

Reasoning is a process of thinking during which the individual is aware of a problem identifies, evaluates, and decides upon a solution.

## Logic:

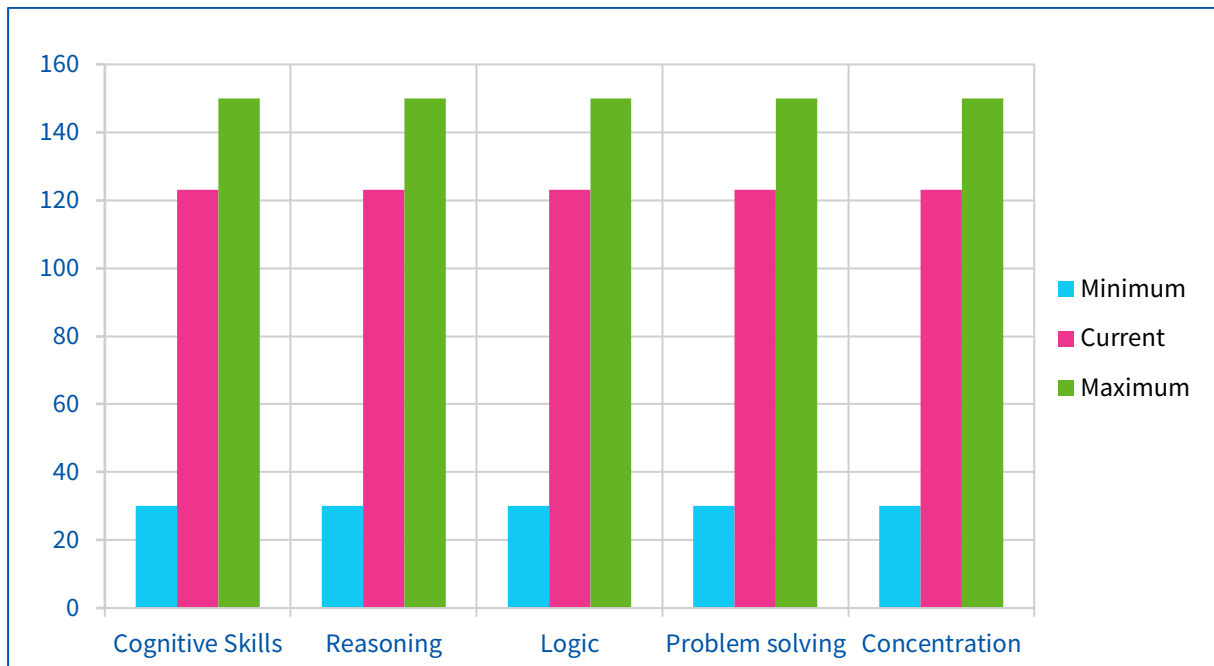

Logical thinking is the ability to make a rational conclusion by analyzing a situation, and it helps the human mind to make a distinction between right and wrong.

## Problem-solving:

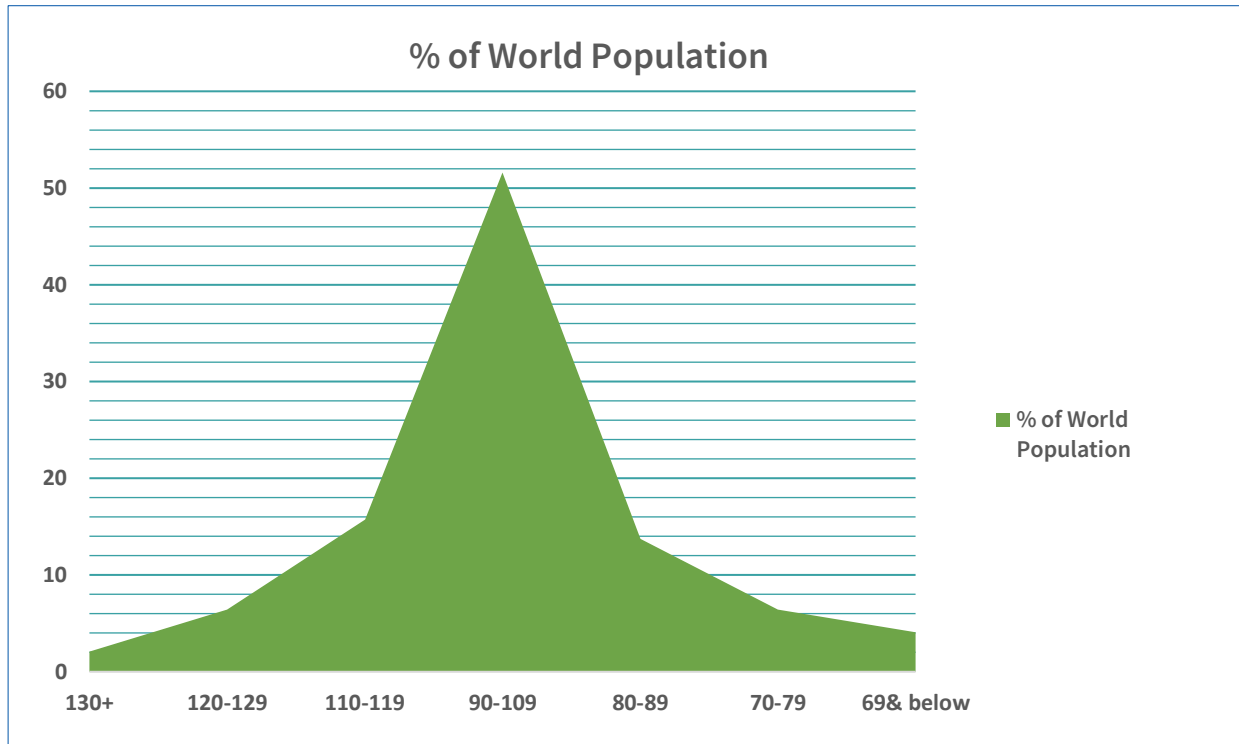

Problem-solving is a mental process that involves discovering, analyzing, and solving problems.

## Concentration:

Concentration is an attentional process that involves the ability to focus on the task at hand while ignoring distractions.
